Series: SXY • Model No. : FLBK06

### Technical Specification

| • SpO <sub>2</sub> |                             | • Power Requirements       |   |
|--------------------|-----------------------------|----------------------------|---|
| Measure range      | 35-99%                      | Battery                    | 2 Batteries with 1.5 volts of AAA sizes |
| Accuracy           | ±1% in the range of 90%-99% |                            | 2 x 1.5v AAA                            |
|                    | ±2% in the range of 70%-89% | • Environment Requirements |   |
| • Pulse Rate       |                             | Operation temperature      | 5~0 °C                                  |
| Measure range      | 30 bpm- 240 bpm             | Storage temperature        | -10~40 °C                               |
| Resolution         | 1 bpm                       | Ambient humadity           | 15-80%,                                 |
| Accuracy           | ±2 bpm                      |                            | No condition in operation 10%-93%       |
| Pulse intensity    | Bargraph                    |                            | No condensation in storage              |
